

Ohio's Aging Eye Public Private Partnership (AEPPP) is a statewide collaboration formed to respond to the growth aging eye challenges in Ohio. The mission of the AEPPP, an initiative, supported by the Ohio Department of Aging, is to develop a strategic plan of action to address issues relating to vision care public policy, vision care services, vision education, and vision research that impact the quality of life for Ohio's seniors now and in the future. The formation of the Partnership and its on-going work is supported by a proclamation from Ohio Governor Bob Taft.

Member organizations of the AEPPP are: AOPHA, Association of Area Agencies on Aging, Association of Ohio Health Commissioners, Council for Older Adults, KnowledgeWorks Foundation, Ohio Council for Home Care, Ohio Association of Gerontology and Education, Ohio Agencies Serving the Visually Impaired, NASA Glenn Research Center, Ohio Department of Aging, Ohio Department of Health, Ohio Department of Insurance, Representative Kathleen Chandler, Ohio Nurses Association, Ohio Ophthalmological Society, Senator Steve Stivers, Senator Randy Gardner, Ohio Rehabilitation Services Commission, Ohio Osteopathic Association, Ohio Optometric Association, Ohio Veterans Visual Impairment Services Team - VISN 10, Opticians Association of Ohio, and Prevent Blindness Ohio.

VISION RESOURCES AND SERVICES FOR OLDER OHIOANS

*Helping Ohioans Enjoy
Good Sight for Life!*

This publication created by Ohio's Aging Eye Public Private Partnership

This resource provided to you by:

Your Vision is Important!

Vision Problems Among Aging Ohioans Are Growing!

Today, there are 1,259,000 older Ohioans affected by vision problems that if not detected and treated early, could lead to blindness. Because of the growth in the aging population, there will be **more than 2.5 million Ohioans affected by vision-robbing conditions by the year 2030**, largely resulting from the eye diseases of diabetic retinopathy, cataract, glaucoma, and age-related macular degeneration (AMD). The burden on our health care system, social/rehabilitative service programs, and quality of life will be staggering.

Did You Know That....

- **Age Related Macular Degeneration** creates a loss of sharp, central vision. No successful treatment is currently available.
- **Diabetic Retinopathy** involves abnormal growth of blood vessels in the back of the eye which can leak. Management of diabetes and regular preventative eye exams are the best defense against developing diabetic retinopathy.
- **Cataract** is a clouding of the eye's naturally clear lens. This is usually treatable.
- **Glaucoma** causes the loss of peripheral or side vision. Once vision is lost, it cannot be restored; however,

further loss of remaining vision can usually be prevented with treatment.

(Fourth Edition of *Vision Problems in the U.S.*, 2002 - PREVENT BLINDNESS AMERICA and the National Institutes of Health (National Eye Institute.)

It is Easy to Protect Your Sight!

There are several steps you can take to make sure that your vision remains healthy for as long as possible. Eat a healthy diet as recommended by your doctor, exercise, do not smoke, and most important —

Have an eye exam performed by an eye care professional on a regular basis!

Many eye diseases, such as those associated with diabetes or age do not exhibit any initial symptoms before permanent vision loss can occur. An eye exam with pupil dilation is the best defense against undetected eye disease.

Need Help Finding Eye Care Professionals and Resources?

Read on to find a variety of statewide telephone numbers to help you find an eye doctor, prescription assistance, rehabilitation services, educational materials, access to low or no cost eye exams, and much more!
