Workiva: Rethinking Compliance to Drive Down Enterprise Risk

In my opinion

Chairman & CEO

Matt Rizai,

CIO

CIO Insights

Cleveland Sight Center

By Michael T. McManamon, CIO, Cleveland Sight Center

Technology has become not just accepted in the workplace but an integral part of our daily lives. People are now bringing in the business IT department elements for the newest and most up to date technology. Regardless of your job role, you now need to be computer literate. Many of us are still learning how to best manage this technology; we have to learn to put technology into the workplace regardless of policies and planning, a situation we must deal with head on. There are many additional complications of the consumption of technology that we have never encountered before. Information security threats have multiplied and technology is changing so fast it is almost impossible to keep up with the ever-changing threats. It is a very challenging and time-consuming task to protect the organization from these threats.

One of the biggest challenges we face as an organization is maintaining a holistic picture of whom they are and where they want to be. We have been attempting to achieve contact data integrity for many years now, but we have been making the wrong attempts. Our technology has taken a significant role in the daily lives of most staff. People have been taking it for granted, as technology has taken a significant role in the daily lives of most staff. People have been taking it for granted, as technology has taken a significant role in the daily lives of most staff. People have been taking it for granted, as technology has taken a significant role in the daily lives of most staff. People have been taking it for granted, as technology has taken a significant role in the daily lives of most staff.
